## EXPERIENCE

---

### Data Automation Assistant | Family Business | 2024 – 2025

- Developed and deployed Python scripts to automate extraction of monthly financial data.
- Engineered a structured data pipeline to auto-generate annual financial reports in Excel.
- Reduced manual reporting workload through automation.
- Implemented validation logic to ensure data integrity and accuracy.
- Optimized data cleaning workflows to improve reporting efficiency.

## PROJECTS

---

### Personal Website Developer — [fallenl1fe.com](https://fallenl1fe.com) | 2025 – Present

- Designed and built a fully functional personal website from scratch.
- Developed front-end layout using HTML and CSS.
- Structured content for clarity and optimized user experience.
- Managed hosting and deployment independently.
- Used GitHub for version control and updates.

### Personal Minecraft Server Administrator | Jan 2025 – Present

- Deployed and managed a private Minecraft server environment.

- Configured server-side software, plugins, and network ports for secure access.
- Performed maintenance including updates, optimization, and backups.
- Troubleshoot hardware and software compatibility issues.
- Assembled custom desktop systems and configured server environments.
